CLINICAL PRACTICE

My clinical practice in orthopaedics surgery is split between general orthopaedics and a special interest in hand surgery. I was responsible for registrar training in hand surgery for registrars on the Sheffield training scheme. Since leaving the NHS I have practised privately at Thornbury Hospital Sheffield and Claremont Hospital.

MEDICO-LEGAL PRACTICE

I have practised in this area for many years. On an established basis since 1982. I accept instructions both for personal injury and for medical mal-practice cases from plaintiffs' and from defendants' lawyers. I have been responsible for the organisation of courses designed to train potential experts in report writing.

I specialize in the preparation of reports in the areas of bone and soft tissue injury to both upper and lower limbs including back and neck injury having practised as a trauma surgeon for many years. I also specialize in the area of work related upper limb injury including teno-synovitis carpal tunnel syndrome and epicondylitis. I prepare approximately 400 reports per annum and have considerable court experience. At present approximately 60% are prepared for solicitors acting for the claimant

I also prepare reports for solicitors defendant and claimant in cases of potential clinical negligence approximately 40-50 reports per year. I have considerable court experience. I have been working in this area since 1982. At present my instructions are 50% claimant and 50% defendant.
